

Langkah-Langkah Penggunaan Hitung Umur dan Hari Ultah

1. Masukan tanggal lahir di JDataChooser, dan Klik tombol Hitung.

The screenshot shows a Java Swing window titled "Menghitung umur dan ultahmu". The window has a light blue background. It contains three input fields and two buttons. The first input field, labeled "Tanggal Lahir :", contains the text "Apr 4, 2004" and has a small calendar icon to its right. The second input field, labeled "Umur Anda :", contains the text "20 tahun, 6 bulan, 25 hari". The third input field, labeled "Ulang Tahun Anda Berikutnya :", contains the text "5 bulan, 6 hari lagi". To the right of the first input field is a button labeled "Hitung". To the right of the second input field is a button labeled "Clear".

2. Klik tombol clear untuk menghapus isi-nya.

The screenshot shows the same Java Swing window "Menghitung umur dan ultahmu". The input fields are now empty. The "Tanggal Lahir :" field is empty, the "Umur Anda :" field is empty, and the "Ulang Tahun Anda Berikutnya :" field is empty. The "Hitung" and "Clear" buttons are still present on the right side of the window.

3. Untuk Variasi peristiwa apa yang terjadi pada hari lahir belum saya tambahkan, karena belum dapat API yg gratis hehe....
